

Vista Elégance

Drop-arm awning

Your sun protection system dealer:

Vista Elégance

The Vista Elégance is an elegant sun blind that is available in two designs. Both have a unique characteristic and appearance but technically, they are identical. The Vista Elégance 95 is characterised by the semi-cassette with a square design. The Vista Elégance 110 is a cassette with a slanted design (as shown above).

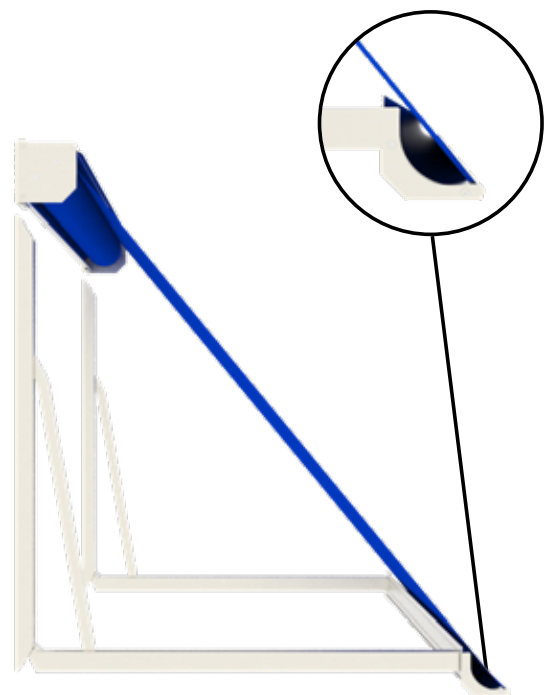

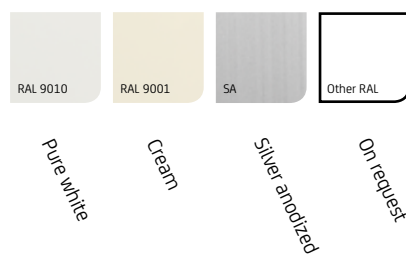

The outward characteristic is obvious, the difference in cassette concerns the fabric protection when closed. A semi-cassette offers good protection, a cassette offers full protection. Thanks to its variable extension angle, the awning can be installed nearly everywhere. Combined with electric operation, this is a highly effective sun blind, both for residential and commercial buildings. The awning can also be operated manually. Available in three standard colors, however, every RAL colour is available on request.

Characteristics

- Retaining a clear view
- Choice out of 2 models: 95 and 110
- Variable projection
- Available with valance: Vista Elégance 110
- Available with manual or electrical control system
