

SOLIDSKY

Skylight Awnings

A pleasant living space

Discover the variety of the SolidSky awning, the perfect addition to a skylight or smaller veranda. The SolidSky creates a cool atmospheric spot during hot sunny days. This way, your home or terrace will always remain a pleasant place to stay.

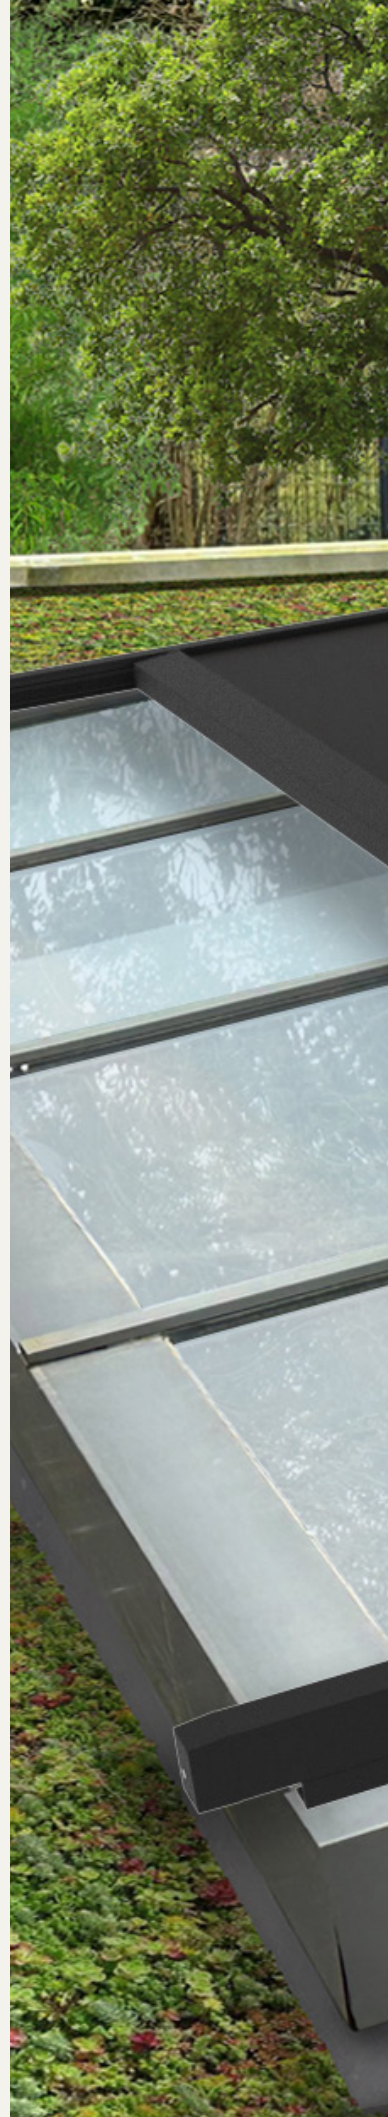

By better regulating heat and cold, you save on heating and cooling costs, depending on the season. Moreover, you are assured of protection against harmful UV radiation. This contributes to your health and the lifespan of your interior and/or exterior. With SolidSky, you choose full control over lighting and the atmosphere of your living environment. The perfect harmony between functionality and style.

SOLIDSKY

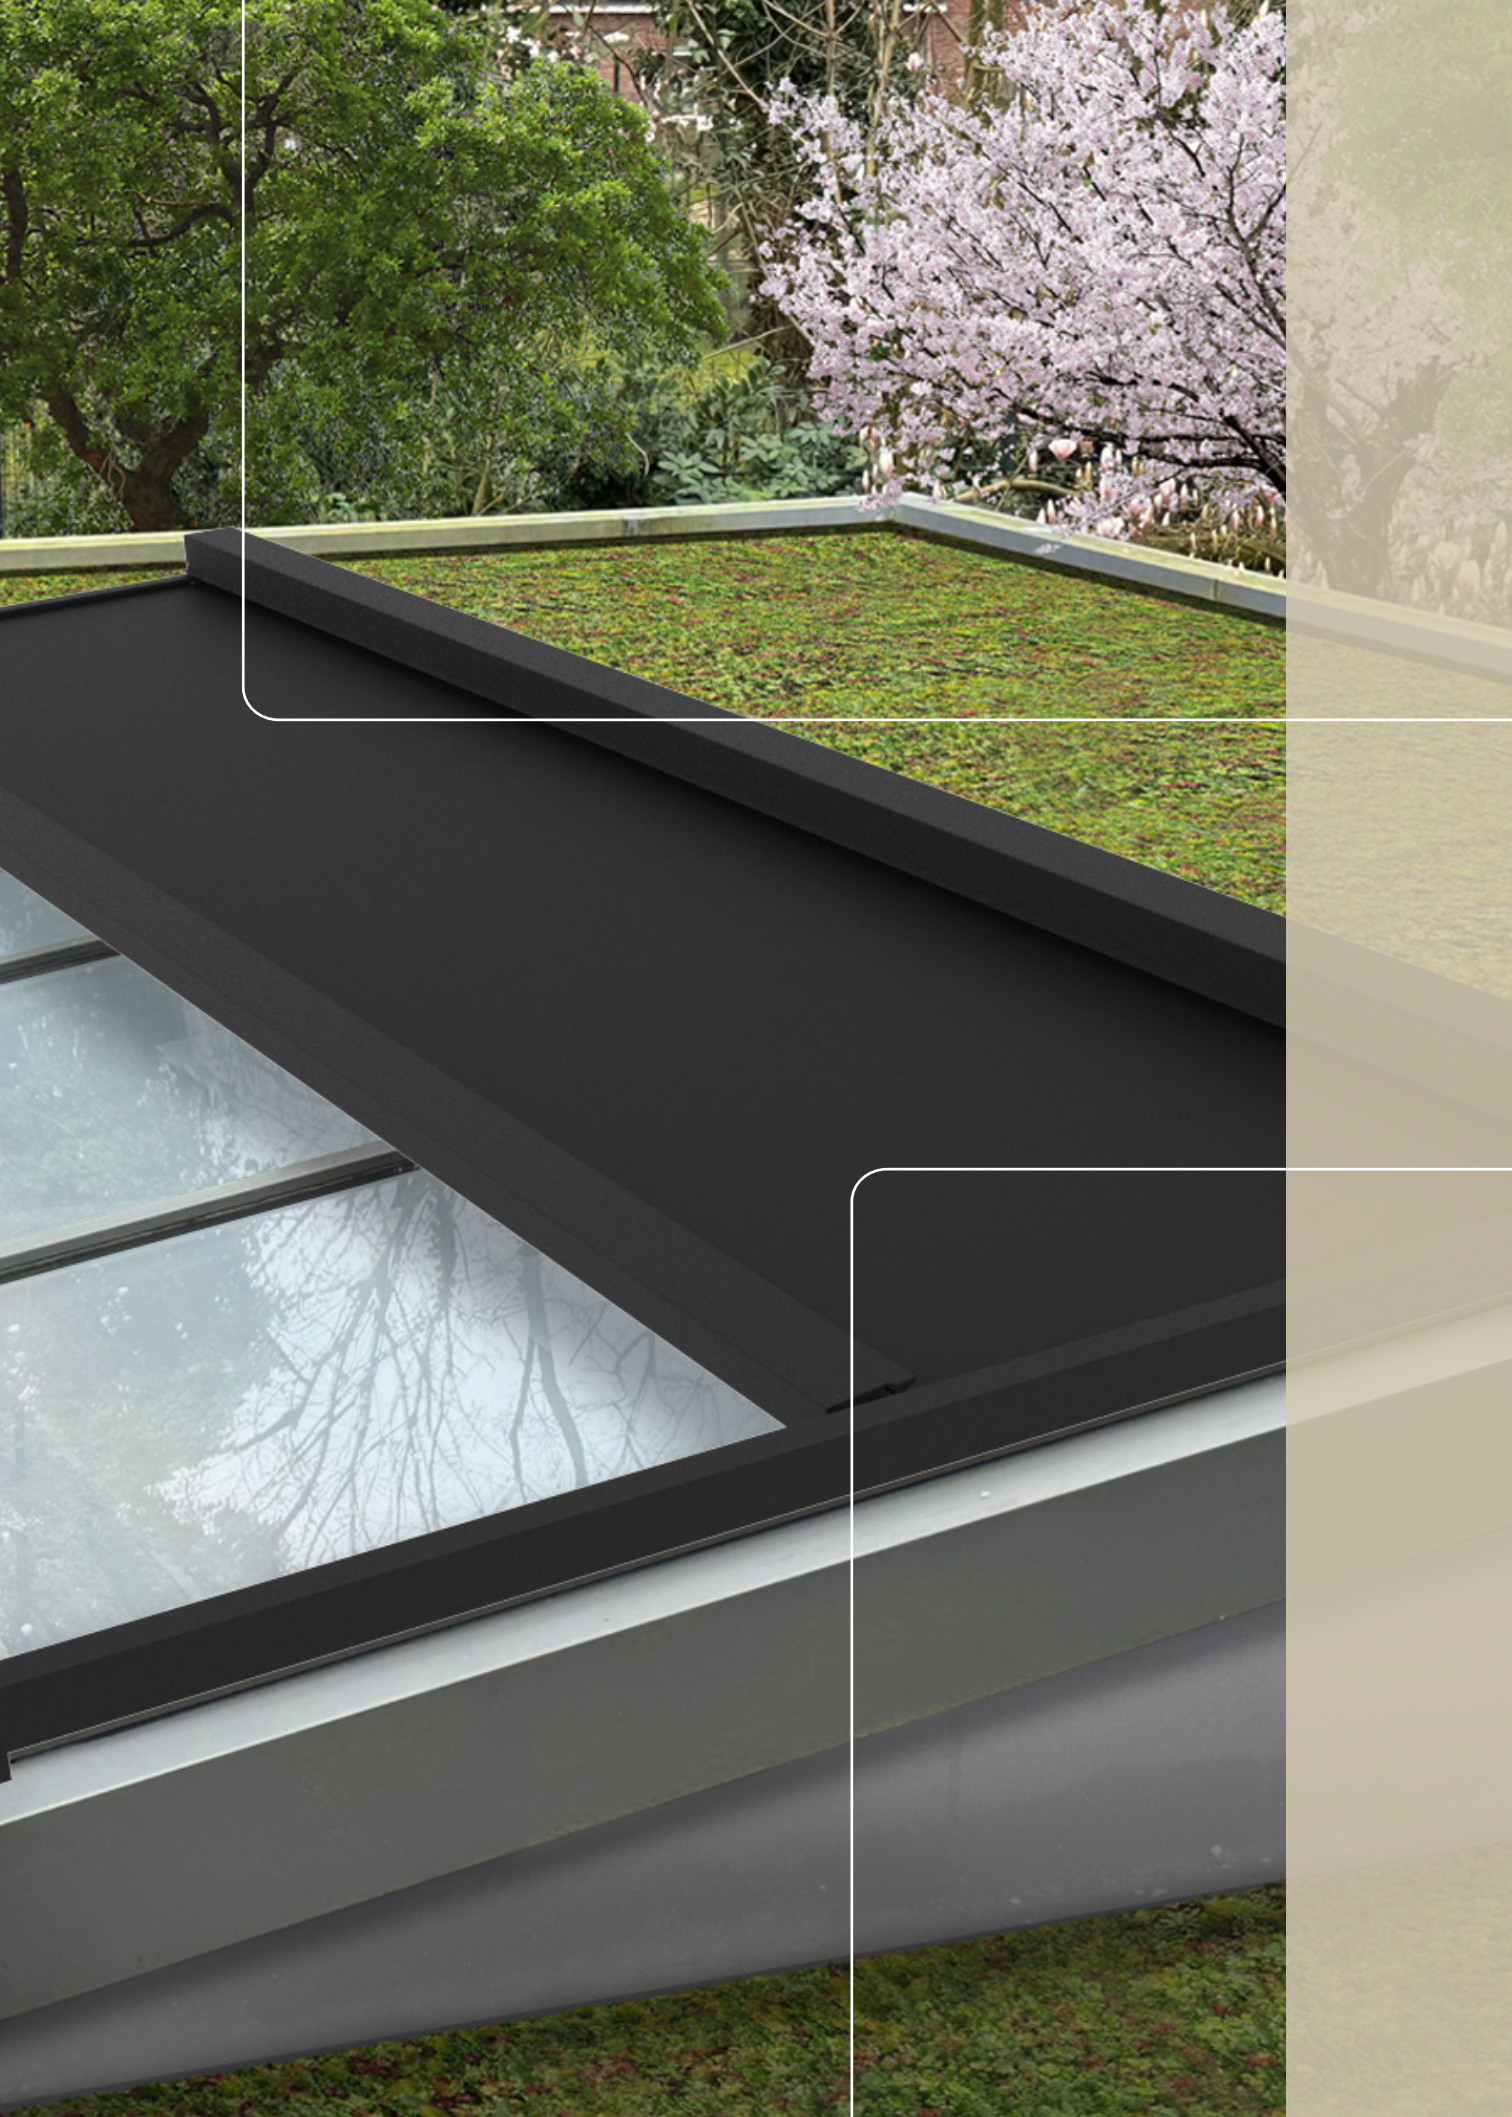

The versatility of the SolidSky

The SolidSky skylight awning is suitable for various types of skylights and can even be mounted on small conservatories. There are several advantages of skylight awnings:

- Can be mounted indoors and outdoors
- Control light and shade in your room
- Keeps the room cool
- Contributes to energy savings
- Protects against the sun
- Protects furniture from discolouration
- Creates a space with privacy
- Easy to control

DISCOVER

Sunscreen fabric

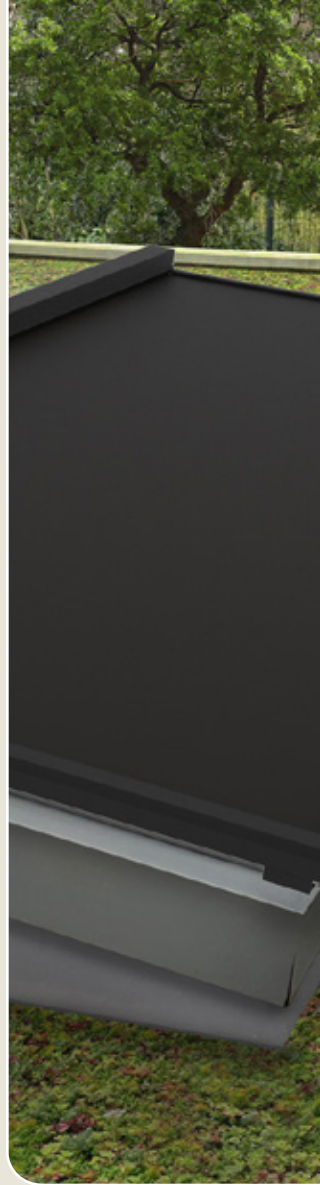

An important part of outdoor sun protection is the fabric. For instance, the fabric provides protection against UV radiation, saves on energy costs and creates atmosphere. There are various options when it comes to material and design. Almost anything is possible. It's all about what suits your situation and wishes.

Contribute to KWF Dutch Cancer Society

With a selection from the Tibelly brand's fabric collection, a contribution goes to KWF Dutch Cancer Society. For more information about the fabric and the contribution, please visit [Tibelly.nl](https://www.tibelly.nl).

Specifications

The SolidSky can be mounted either above or below the skylight. The advantage of mounting above the skylight is that the heat within your house is better regulated. In summer, the awning prevents your room from getting too hot and in winter it warms it up. Mounting under the skylight glass offers the advantage of the awning being less subject to wear and tear. Weather influences play a smaller role with this type of mounting.

Popular colours

Pure white (RAL 9010)

Cream (RAL 9001)

Anthracite grey textured (RAL 7016)

Jet Black textured (RAL 9005)
